

ENGR. JATSEN P. GESTA

Software Engineer

Trece Martires, Cavite, 4109

+63 962 192 6650 | gestajatsen@gmail.com | linkedin.com/in/jatsengesta

PROFILE SUMMARY

Results-driven Software Engineer with over 3 years of experience designing, developing, and maintaining full-stack applications in a production environment. Experienced in software development lifecycle (SDLC), SQL optimization, debugging, performance tuning, and delivering scalable software solutions. Skilled in translating business requirements into reliable applications while collaborating within Agile development teams in a hybrid work environment. Proficient in modern AI-assisted software development using Claude Code, GitHub Copilot, Amazon Q, OpenAI Codex, and prompt engineering to accelerate development, improve code quality, automate repetitive tasks, and increase engineering productivity.

PROFESSIONAL EXPERIENCE

Software Engineer

July 2023 – Present

E-Science Corporation | Muntinlupa City

- Develop, enhance, and maintain production-grade full-stack web applications following established coding standards and software engineering best practices.
- Implement new features and system enhancements based on approved business requirements and technical specifications.
- Analyze development tasks by reviewing requirements, estimating implementation effort, and identifying technical risks before development.
- Optimize SQL queries, stored procedures, and application scripts to improve system performance, scalability, and data reliability.
- Troubleshoot software defects, refactor legacy code, and participate in continuous application improvements.
- Collaborate with software engineers, QA testers, product owners, and stakeholders in an Agile environment to deliver high-quality software releases.
- Utilize AI-assisted development tools, including Claude Code, GitHub Copilot, Amazon Q, OpenAI Codex, and prompt engineering techniques, to improve coding efficiency, debugging, documentation, rapid prototyping, and solution design.

Software Engineer Intern

March 2023 – June 2023

E-Science Corporation | Muntinlupa City

- Assisted in developing API features, including CRUD operations, under senior developer supervision.
- Practiced SQL query validation for file uploads and data processing.
- Gained hands-on experience in version control, debugging, and real-world development workflows.
- Demonstrated strong initiative in learning company standards, tools, and best practices.

EDUCATION

Bachelor of Science | Major in Computer Engineering

2019 - 2023

Technological University of the Philippines - Dasmariñas City, Cavite

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Python Programming, Full-Stack Web Development, SQL Database
- **Projects:** PET Bottle to Points System, JBW File Management System

SKILL & INTEREST

Skills: Python, Java, Software Development, Communication Skills, Microservices, Angular, TypeScript, JavaScript, JIRA, SQL, Version Control, REST API, AWS (Lambda, Cognito, S3, CloudWatch), Git, Serverless Framework, AI-Assisted Development (GitHub Copilot, Amazon Q, Codex, Prompt Engineering), Rapid Prototyping, Code Optimization

Languages: Tagalog, English

Interests: Coding, Artificial Intelligence, Reading Books, Working Out, Running, Basketball, Content Creation, Boxing
